

QUIZ 2 (B)

NAME: _____

SECTION _____

STUDENT ID: _____

1. Consider following data declaration and fill memory in HEX. ASCII for **A= 41h**.Data memory start at **00008500**

[illegible]

QUIZ 2 (B)

NAME: _____

SECTION _____

STUDENT ID: _____

2. Consider following declaration write a code that copy string1 in capital letter to string2 using indirect addressing and masking. **NOTE:** str1ptr hold address of string1 you are supposed to use it to access the address of string1

```

STRING1 DB "NEW STRING OF SMALL CHARACTER"
string1size=$-string1
string2 DW string1size DUP(?)
str1ptr DD offset string1
    
```

3. Consider following code fill registers and memory accordingly. Data memory start at **0100**

DATA																
<pre> num1 WORD 1,2,3 n1=3 v1 EQU 5*n1 v2 TEXTEQU <2*n1> v3 TEXTEQU %2*n1 n1=4 ary BYTE v1,v2,v3,n1 </pre>																
CODE											REGISTER					
<pre> mov ax,num1+1 mov bl,n1 mov cl,ary+3 mov dx,WORD PTR ary+2 mov esi,DWORD PTR ary </pre>											ax					
											bl					
											cl					
											dx					
											esi
