excellent

Question 2

1. About US:

Professional

~~I am an experienced marketing analyst with~~
over 10 years of experience in both ~~local~~

I am a professional marketing analyst
with over 10 years of experience in
international and local ~~markets~~ (Pakistani) markets -

Skills 2

2. Problems:
- Quantified statements are not being used.
 - Furthermore, it lacks professionalism and conciseness.
 - Stating personal hobbies (e.g. I enjoy being creative ...) does not directly show how one may contribute to a company. Also more technical jargon should be used.

Improved:

I have implemented UI/UX designs for over a dozen websites through tools like photoshop and kaggle. I believe my creativity ~~interests and curiosity~~ directly helps me in ~~my design works~~ making better designs.

3. ~~I want to~~ ^{growth}
- I am an aspiring data scientist who wants to leverage his skills in advanced statistics and python to create innovative solutions for big data systems.

Question 3

Executive Summary

07

^{the recommendation}
The purpose of report [#] Implementation of AI Writing Assistants in Academic writing at NUCES¹ is to propose an integration of a licensed AI writing assistant into NUCES FAST's Learning Management System, Slate. The researchers claim that this tool will help students organize their writing structure, use proper transitions and improve their grammar.

This study surveyed 300 students for writing challenges, gathered feedback from 10 instructors about his mission and performed an analysis of 30 pre- and post-AI writing samples. The results were evaluated on:
Grammar, structure, vocabulary, ^{and} student and faculty satisfaction.

The findings of this research includes more.

This research was able to find out that more than 60% students reported a positive impact on writing quality. Additionally, it was discovered that 80% of the students were in support of this reform. However, it must be noted that professor expressed their due concern about fair use and ~~checking over~~ over-reliance. *How many?*

The analysis of 30 samples concluded positive results. There was ^{more than a} 33% improvement in sentence clarity and transition words, and ~~gram~~ grammar error reduced by 66%. Furthermore, ~~exp~~ A majority of 20% who voted out of favor of AI were neutral, while a small portion was against it.

The research concludes that this reform will bring more good than harm to the university. It also provides the following recommendations:

- ① AI writing assistant integration with slate &
- ② training sessions, etc.
