

MT-2005: Probability and Statistics SE Stream

Serial No:

2nd Sessional Exam

Total Time: 1 Hour

Total Marks: 30

Saturday, 6th April, 2024

Course Instructors

Hazber Samson, Waqas Munir, Rijah Khan

Note: Normal Distribution Table is attached.

Q1:

[marks: 2+2+2=6]

The probability that a married man watches a certain television show is 0.4, and the probability that a married woman watches the show is 0.5. The probability that a man watches the show, given that his wife does, is 0.7. Find the probability that

- (a) a married couple watches the show;
 - (b) a wife watches the show, given that her husband does;
 - (c) at least one member of a married couple will watch the show.
-

Q2:

[marks: 2+2+2=6]

Three coins are tossed once. Let X denote number of heads appeared. Find the following

- (a) Probability distribution of X.
- (b) Expectation of X.
- (c) Variance of X.

Q3:

[marks: 2+2+2=6]

Probability density function of a random variable X is given by

$$f(x) = \begin{cases} k \sqrt{x}, & 0 \leq x \leq 1 \\ 0 & \text{otherwise} \end{cases}$$

- (a) Find the value of k .
 - (b) Find cumulative distribution function, $F(x)$,
 - (c) Evaluate $P(0.3 < X < 0.6)$ using cumulative distribution function, $F(x)$.
-

Q4:

[marks: 3+3=6]

- (a) According to *Chemical Engineering Progress*, approximately 30% of all pipework failures in chemical plants are caused by operator error. What is the probability that out of the next 5 pipework failures at least 3 are due to operator error?
 - (b) On average, 3 traffic accidents per month occur at a certain intersection. What is the probability that in any given month at this intersection at least 2 accidents will occur?
-

Q5:

[marks: 2+2+2=6]

A set of final examination grades in an introductory statistics course is normally distributed, with a mean of 73 and a standard deviation of 8.

- (a) What is the probability that a student scored below 91 on this exam?
 - (b) What is the probability that a student scored above 60 on this exam?
 - (c) What is the probability that a student scored between 60 and 91 on this exam?
-

Best of Luck !
