

Marks: 10

QUIZ-1

Time: 20 Minutes

Subject: Probability and Statistics

Section: A

Instructor: Hazber Samson

Date: 03-02-2024

Student Name _____

Roll No _____

Q1. Fill in the blanks.

(5)

(a) In data analysis value calculated for the population is called parameter and value calculated for the sample is called statistic

(b) For the arranged data set 2,3,a,a,9 mode is 5 then mean will be 4.8 and median will be 5

(c) If $\bar{x} = 5$ also $y = 2x + 3$ and $z = 4x - 6$ then $\bar{y} = 13$ and $\bar{z} = 14$

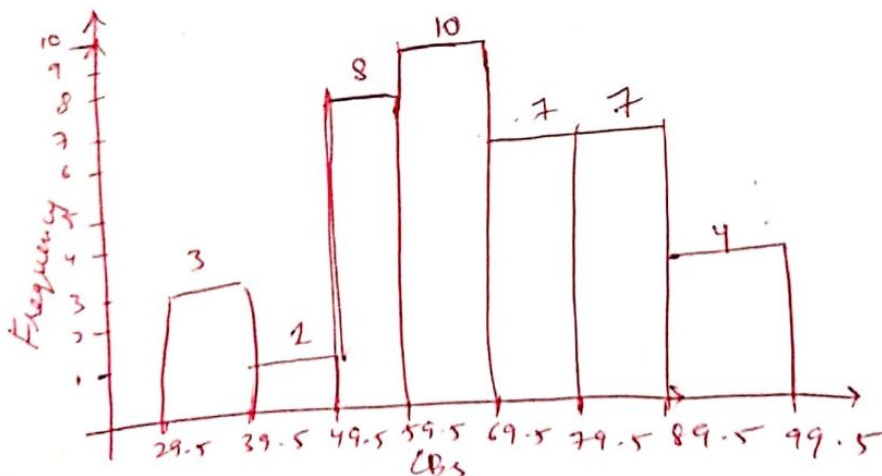

(d) If we have data set 1,1,2,2,3,3 then mean + median + mode = not possible and mean $\times$ median $\times$ mode = not possible

(e) $\sum 1 + \sum f = 1$ also $\prod 1 \times \sum 1 = n$

Q2. Construct Histogram for the data given below

(5)

Classes	Frequency	CBs		
30 - 39	3	29.5 - 39.5		
40 - 49	1	39.5 - 49.5		
50 - 59	8	49.5 - 59.5		
60 - 69	10	59.5 - 69.5		
70 - 79	7	69.5 - 79.5		
80 - 89	7	79.5 - 89.5		
90 - 99	4	89.5 - 99.5		

GOOD LUCK !
