In the following paragraph there are FIVE errors of Subject-Verb agreement. Underline the errors and write ONLY the correct verb form.

After almost forty years on television, there **is** few honors that Sesame Street has not won. The awards are deserved, for Sesame Street is a show that **treat** children with respect. Most children's programs consist of cheaply made cartoons that are based on the adventures of a superhero or a video-game character. Unfortunately, children's TV programs are generally so poor because quality kids' shows do not make the profits that the networks demand. Both the superhero story and the video-game story **is** easy to slap together. By contrast, the producers of Sesame Street spend enormous amounts of time and money researching how children learn. Another reason for the low profits **are** the nature of the audience. Because children have little money to spend on sponsors' products, each of the networks **charge** bottom rates for advertising during children's programs.

In the following paragraph there are FIVE errors of Subject-Verb agreement. Underline the errors and write ONLY the correct verb form.

Although it is difficult to solve public health problems, great success **have** been achieved with certain illnesses. For example, the eradication of smallpox **were** one of the most significant accomplishments of the 20th century. When the campaign against smallpox was launched in 1967, about 10 to 15 million people contracted the disease each year. Of these, two million died. More than 10 million individuals **was** disfigured. However, a little more than a decade later, the smallpox program had met its goal; the last case of this terrible illness occurred in Somalia in 1977. Following this important achievement, the WHO tried to recreate its success. The focus of the next campaign was polio, which can paralyze or kill its victim. The elimination of this disease **are** not yet complete, but the number of cases **have** greatly decreased.
